

Water Injection Blast Attachment

Water induction blast nozzles

SMARTBLAST water blast equipment has been specifically designed to meet growing customer demand for a multi-purpose cleaning system that is fast, economical and environment-friendly.

Field of application

Dust-reducing high-performance cleaning of steel, stone and concrete surfaces. Cleaning up to grade SA-3.0. Performance up to 20% higher than dry blasting.

Order Code	Description
SMB-12000	Water Blast Attachment, tungsten carbide sleeve

Water Injection Blast Nozzles

Water induction blast nozzles

SMARTBLAST water blast equipment has been specifically designed to meet growing customer demand for a multi-purpose cleaning system that is fast, economical and environment-friendly.

Field of application

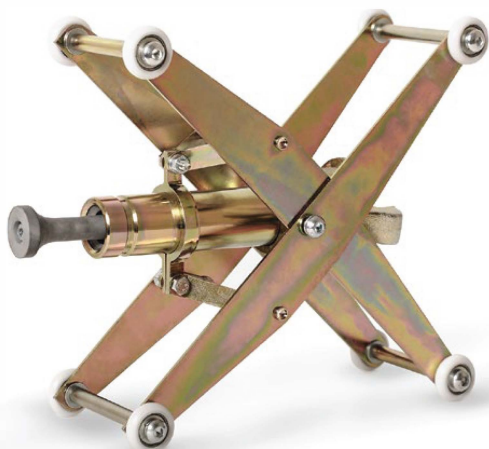

Dust-reducing high-performance cleaning of steel, stone and concrete surfaces. Cleaning up to grade SA-3.0. Performance up to 20% higher than dry blasting.

Order Code	Description
SMB-12002	Water blast nozzle, tungsten carbide, dia. 6.5, entry 32 mm
SMB-12003	Water blast nozzle, tungsten carbide, dia. 8.0, entry 32 mm
SMB-12004	Water blast nozzle, tungsten carbide, dia. 9.5, entry 32 mm

Internal Pipe Blast Tool SMB-1

The SMB-1 pipe cleaning tool is an ideal companion to clean blast pipes from 2" (50mm) to 12" (300mm) inner diameter. The SMB-1 consists of a tungsten-carbide nozzle in a venturi form with a tungsten-carbide circular deflection tip, which blasts abrasive media in a continuous circle pattern. The tungsten carbide materials ensure low wear and a long service life. Centering collars and carriage allow fitting the SMB-1 to any pipe with an inner diameter between 3" (75mm) and 12" (300mm). With the centering collars SMB-1 can be used in the 3" (75mm) to 5" (125mm) I.D. pipe range. With centering carriage SMB-1 is adjustable to handle all diameters between 5" (125mm) and 12" (300mm) I.D.

For pipes 3" (75mm) - 12" (300mm) ID.
Adjustable centering carriage for consistent blast pattern.
Use with standard blast machine.

Order Code	Description
SMB-12630	Pipe blasting tool 3" (75mm) - 12" (300mm) with 12,5 mm nozzle and tungsten carbide (TC) deflection tip. Complete package incl. centering collars sets and centering carriage.

Internal Pipe Blast Tool SMB-2 SPIN BLAST (Rotoblast)

For pipes 12" (304,8 mm) to 36" (914,4 mm) ID.
Variable feed and optimal rotation speed offers flexibility in cleaning rates for varying surface conditions.
Adjustable centering carriage for consistent blast pattern.
Use with standard blast machine.

Order Code	Description
SMB-12730	Pipe blasting tool 12" (304,8mm) - 36" (914,4mm). Complete package incl. Legs set, 2 -5.0 nozzles, 10 x spare leather washers

Closed Circuit Blast Tool

Hand-portable closed-circuit blast tool.

Order Code	Description
SMB-12800	Hand-portable closed-circuit blast tool. Complete package incl. 6 attachments and dust bag

The Closed circuit blast tool is the compact hand-portable closed-circuit blast tool, which can be transported everywhere and required just 2.5m³/min of air at 6bar. Blasting and media recovery are controlled just with one trigger. Media recovery is initiated by slightly pulling the trigger, while pulling the trigger fully starts the suction blast system.

Portable Suction Blast Tool POWER GUN

Lightweight, portable and easily transportable tool.
Suitable for use with all media containers, or even straight out of the bag.
Simple work principle – just plunge the suction lance into the container of abrasive and pull the trigger.
Easy to use and maintain.

Order Code	Description
SMB-12900	Portable suction type blast tool. Complete package incl. suction lance and 5m suction hose

Blast Light ABL

800 lumens, concentrated light cone.
Modern LED technology.
Light housing is specially designed for blast hose mounting.
Simple and fast exchange of the disposable glass.
Mounted ABL light will not interfere with the normal operation of DMH handle.

Order Code	Description
SMB-04000	LED Blast light, approx. 800 lumens, 12-24 V DC, incl. 1.5-m power cord.
